By Letters Patent Secured in 1849.—Pallvermacher's Patent Hydro-Electric Voltaic Chains, constructed to be worn under the germents are the most wonderful discovery in medicine and electricity of the present day. They relieve, without pain or shock, instantaneously, acute nervous pains, such as head, ear and toothache, rhoumatic pains, tie dolorenz, &c., and by their mild but continuous and perceptible action on the body, diseases of years' standing—such as gout, local paralysis, nervous complaints, liver direases &c.—disappear as if by a miracle. They precipitate metals from their solutions, decompose water, deflect the magnetic needle, in short, show all the phenomenon of a powerful voltaic pile. The instruments producing these effects weigh about two ounces, can be folded up in a nocket-book, are always ready for instantaneous use, and will last a man his lifetime, guarding himself, family and friends, &c., agoinst that number of diseases and complaints in which mild streaming electricity is a perfectly safe, certain, and wondurfully speedyromody. Company No. 1, held on Wednesday evening, March 3,
1883, it was unanimously resolved, that the members of the
above company propose Mr. James M. Byrne, their present
foreman, as a candidate for Assistant Engineer. In relaxon
to the office to be filled in the upper districts, we be greated
from any as the company because the second
from the office of the company and firmness, who considers in the upper part of the city, is much needed in the first and second
districts, is a fact that almost every member of the department has admitted. At a meeting held at the ongine house,
it was unanimously resolved, that Mr. Byrne, present fore
man of Engine Company No. 1, is a centleman who is in
every respect eminently qualified to discharge the duties of
an engineer. He has been an active member of the department for a number of years, a greater portion of which time
he has been an officer in the company to which he has been
attached. He has ever been distinguished as an active freman and an efficient officer, and has gained the respect and
exteem of all who know him. Taking these facts into consideration, we are confident Mr. Byrne will, if he is elseted an
engineer, perform the duty in such a manure as will be creditaale to himself and satisfactory to the department. We appeal to you, as men and as fremen, to unite with us and elevate him to the assistant engineership, let us not make Carson or anti-Carson the issue; lay aside all sectional feelings—
loop holes, through which incompetent men, possessing noither character or qualifications, will if we are not cautious,
be enabled to erawl into the Board of Engineers, a body of
men who have herectore, and we sincerely hope that they
always will, possess the confidence and the respect of the department—but rather let the question he —Does Mr. Byrne
possess the necessary qualifications? Every member who is
acquainted with him will, without any hesitation, answer—
